Units of Measurement and Definitions: pCi/L = picoCuries per liter; < = less than; ≥ = greater than or equal to; N/A = Not Available
picoCurie is a unit of radioactivity and is a measurement of how much of the radioactive substance disintegrates or decays. The result value is the measured level of radiation in 1 liter of sample, and the uncertainty value is the possible variation above or below the measured level. The uncertainty of this report is estimated at the 95% confidence level.
