Re: Municipal Sewer Main Extension and Lateral Reconnection
64 South Main Street
Tax Map/Parcel Numbers 7A-024.000/01024
DPW Project Number 10059

Dear Mr. Noble,

Confirming our previous discussions and our meeting at the site on October 22, 2010 with your neighbor, Mr. William Pearson, this office has reviewed your connection permit application to install a new sewer lateral on your property and connect it to the existing municipal sewer behind #32 and #48 South Main Street. We approve this proposal with the following conditions;

1. To provide for reconnecting the lateral from your building and the existing lateral connection of the building at #48 South Main Street (Pearson), a small extension of the municipal sewer and easement on your property is required. The main extension and lateral reconnection shall substantially comply with the plan attached.
2. The installation of the municipal system extension and the lateral reconnections shall be inspected and approved by the Stowe Sewer Department. Any variations from the plan, if unanticipated existing conditions are encountered, shall be reviewed and approved by this office, prior to implementation.
3. You will have prepared a certified as-built of the sewer and lateral reconnection construction and easement documentation, suitable for acceptance and approval by the Stowe Sewer Commission and filing on the Land Records. We understand that you propose to retain Charles Grenier, PE, Consulting Engineer, PC for these services and to assist you with other services associated with modifications to your state wastewater permit.
4. The Town of Stowe shall not be responsible for any cost associated with implementing this approval.

This letter shall also serve to confirm to the State of Vermont, Department of Environmental Conservation, Wastewater Management Division, for the purposes of your modification or your State Wastewater System and Potable Water Supply Permit, (WW-5-1425-1), that your building is currently connected to the municipal water and sewer systems and the Town supplies and treats the existing connected loads from the subject property with calculated allocation flows of 1107 GPD for water and 984 GPD for sewer.

If you or any of the other interested parties have any questions or require additional assistance with this matter, please call.

Very Truly Yours,

Harry J. Shepard
